

Configuring Solutions Setup (Remote Sites)

To build Conga Composer solutions with the Solution Manager you first need to enable remote sites.

1. Navigate to the Conga Solutions Setup tab.

Use the *All Tabs (+)* option to locate Conga Solutions Setup if you do not see it.

2. Click Add for all four of the Remote Site URLs.
3. Click **Save** in the *Remote Site Edit* window.
4. Close the *Remote Site Edit* window.
5. Repeat for each Remote Site until all four sites have a green check mark (see below).
